THE HEATING AND VENTILATING MAGAZINE

INDEX TO VOLUME IX

1912

NEW YORK
HEATING AND VENTILATING MAGAZINE CO.
1123 BROADWAY

A.

Air in school rooms, proposed standard arrangements for testing, April.
delivery of, through ducts, graphic method of figuring, Burt S. Harrison, Sept.
conditioning apparatus, elements of design of humidifiers and of, Willis H. Carrier and Frank L. Busey, March.
figuring flow of, in metal pipes by chart, Burt S. Harrison, Jan.
problem, a solution of the fresh, Nov.
washers, a method of humidity control for, J. I. Lyle, Nov.
a simple method of testing, for carbon dioxide, A. C. Norris, Dec.
impurities—dust, fumes and gases, Charles Baskerville, Dec.
effect of confined, upon health of workers, Geo. M. Price, Dec.
American Society for Heating and Ventilating Engineers,
nominations for 1912, Jan.
suggested topics for discussion, Jan.
newly-elected members, Jan.
Illinois Chapter, Jan., April, May, Nov., Dec.
New York Chapter, Jan., March, April, May, June, Oct., Nov., Dec.
eighteenth annual meeting, Feb.
Massachusetts Chapter, Feb., April, July, Oct. Dec.
New York Chapter's recommendations for compulsory ventilation of moving picture shows, Feb.
new members, Feb.
topics for summer meeting, June.
new constitution adopted, June.
committee on legislation for New York State, July.
new members, Feb., July.
Massachusetts Chapter, organized, March.
factory ventilation in New York State, March.
Illinois Chapter inspects Chicago Ventilation Commission's experimental room, March.
topics for summer meeting, June.
new constitution adopted June.
committee on legislation for New York State, July.
semi-annual meeting, Aug.
committee to co-operate with district heating engineers, Oct.
delegates to conservation congress, Oct.
nominations of officers for 1913, Dec.
committee on annual meeting, Dec.
American Society of Mechanical Engineers, Jan., May, Dec.
Armstrong, Chas. G., report of—New York school buildings criticised, Aug.

B.

Baskerville, Charles, air impurities—dust, fumes and gases, Dec.
Bennett, B. W., ventilation of the Pennsylvania tunnel to New York City, Aug.
Bernhard, boiler, a new type of house-heating water-tube boiler. Nov.
Biro, L., the neutral zone in heating and ventilation, June.
Boiler, a new type of house heating water-tube, Nov.
and Radiator Manufacturers' Association, July.
rating, house heating, July.
Boston, record of the weather in, for Nov., 1911, Jan.
record of the weather in, Dec., 1911, Feb.
record of the weather in, for Jan., 1912, March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912, June.
record of the weather in, for Oct., 1912, Dec.
Building cost data, Nov.
costs of a modern skyscraper, Sept.
Busey, Frank L., and Willis H. Carrier, elements of design of humidifiers and of air conditioning apparatus, March.
and Willis H. Carrier, rate of heat transmission in indirect surface air heaters, Jan.
British Institution of Heating and Ventilating Engineers.
annual meeting, March.
summer meeting, Aug.
autumn meeting, Nov.

C.

Campbell, William, rotation of normal temperatures Aug.
Canadian Society of Sanitary and Heating Engineers, Sept.
Carrier, Willis H., and Frank L. Busey, elements of design of humidifiers and of air conditioning apparatus, March.
and Frank L. Busey, rate of heat transmission in indirect surface air heaters, Jan.
Cash, A. W., problems in pressure reduction and regulation, Sept.

Baskerville, Charles, air impurities—dust, fumes and gases, Dec.
Bennett, B. W., ventilation of the Pennsylvania tunnel to New York City, Aug.
Bernhard, boiler, a new type of house-heating water-tube boiler. Nov.
Biro, L., the neutral zone in heating and ventilation, June.
Boiler, a new type of house heating water-tube, Nov.
and Radiator Manufacturers' Association, July.
rating, house heating, July.
Boston, record of the weather in, for Nov., 1911, Jan.
record of the weather in, Dec., 1911, Feb.
record of the weather in, for Jan., 1912, March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912, June.
record of the weather in, for Oct., 1912, Dec.
Building cost data, Nov.
costs of a modern skyscraper, Sept.
Busey, Frank L., and Willis H. Carrier, elements of design of humidifiers and of air conditioning apparatus, March.
and Willis H. Carrier, rate of heat transmission in indirect surface air heaters, Jan.
British Institution of Heating and Ventilating Engineers.
annual meeting, March.
summer meeting, Aug.
autumn meeting, Nov.

C.

Campbell, William, rotation of normal temperatures Aug.
Canadian Society of Sanitary and Heating Engineers, Sept.
Carrier, Willis H., and Frank L. Busey, elements of design of humidifiers and of air conditioning apparatus, March.
and Frank L. Busey, rate of heat transmission in indirect surface air heaters, Jan.
Cash, A. W., problems in pressure reduction and regulation, Sept.

Central heating plants, possible causes of financial loss in operating, A. D. Spencer, July.
hot water heating system, analysis of operating conditions of a, Ira N. Evans, Oct.
station heating records, how to keep, H. R. Wetherell, Sept.
station heating, sources of trouble in customers' installations, William E. Darrow, Aug.
station steam heating rates, analysis of, A. E. Duram, Sept.
Chapman, George E., regulating the flow and return temperatures in a large hot water heating system. Public Service Co. of No. Illinois, Aug.
Chicago heating and contracting engineers, April.
bureau of ventilation, inspectors wanted for, March.
civil service examination for ventilating inspector in charge, Aug.
new bureau of ventilation, Jan.
Chicago, record of the weather in, for Nov., 1911, Jan.
record of the weather in, for Dec., 1911. Feb.
record of the weather in, for Jan., 1912, March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912, June.
record of the weather in, for Oct., 1912, Dec.
Child & Scott Co. succeeds G. A. Suter & Co., May.
Coal testing in Indiana, Jan.
Concrete factory buildings, heating large, Lee Tire & Rubber Co., Conshohocken, Pa., May.
radiator, July.
radiators, German, Aug.
Contract documents, standard forms for, Jan.
Cooley, M. S., tests of vacuum cleaning tools and exhausters, Feb.
requirements of an ideal vacuum cleaning system, Dec.
Cooling systems for rooms, July.
Consulting engineer.
1. radiation losses in single and double pipe systems, Nov.
2. water logging of radiators from below on a one-pipe job, Nov.
3. amount of radiation required with one and two-pipe systems, Nov.
4. partially filling a steam radiator with a single-pipe connection, Nov.
5. Location of Air Inlets and Outlets, Dec.
6. Cause of Failure of Fan System to Heat School, Dec.
7. Water Heaters for Vacuum Heating Systems, Dec.
Correspondence.
peculiar conditions in steam heating plant, Jan.
is more air needed with increased humidity? Jan.
cross-sections of chimneys, Jan.
pumps in vacuum heating systems, Feb.
champions vapor heating, April.
heating conditions in Winnipeg, Canada, April.
quantity of air delivered under different pressures, April.
health and ventilation, J. M. W. Kitchen, M.D., Dec.
distribution of air in rooms, June.
Current heating and ventilating literature, Jan., Feb., March, May, June, Aug., Dec.
Currents of air in front of windows, H. W. Whitten, Jan.
Curtis, Spencer, float valves for vacuum heating systems, April.

D.

Damper, new type of, July.
Danforth, John W., death of, Jan.
Daniels, M. E. Preston, use of pumps in vacuum steam heating, Jan.
Davis, Verner F., mystery of temperature regulation, April.
Darrow, William E., sources of trouble in customers' installations, Aug.
Donnelly, James A., time element in heating apparatus, May.
time required to heat a radiator, Oct.
Drying apparatus, H. C. Russell, April.
Duram, A. E., analysis of central station heating rates.
Dust in relation to heating, Konrad Meier, March

E.

Efficiency society, Aug.
in labor for the heating industry, Norman A. Hill, Feb.
Electricity, heating office buildings by, July.
Engineering Review sold, Sept.
Evans, Ira N., vacuo hot water heating by forced circulation, Feb.
Export trade, a method of promoting, Sept.

F.

Factory life, dangers to health in, Jan.
ventilation in New York State, March.
Fans and blowers, removal of waste and refuse by, F. R. Still, Oct.
Federal Furnace League, April, May.
annual meeting, June.
to reorganize, Sept.
dissolved, Oct.
Federal heat unit at work, Federal system of heating and ventilation, March.
Feldman, A. M., ventilation of a steam laundry, March.
ventilation of a dispensary building, Sept.
Fire record, January's high, March.
Flange schedule, 1912 U. S. Standard, March.
Flanges, government hearing on, Aug.
Francis Bros. & Jellett, Inc., dissolving, April.

G.

Gas heaters, economy shown in operating tests on, June.
Gills for houses, June.
Glass, porous, for ventilating purposes, July.

H.

Harrison, Burt S., figuring flow of air in metal pipes by chart, Jan.
graphic method of figuring delivery of air through ducts, Sept.
thermal chart, March.
Health and ventilation, Leonard Hill, Nov.
discussion of, Dec.
Heat, thermo-dynamic method of producing, Jan.
transmission, rate of, in indirect surface air heaters, Willis H. Carrier and Frank L. Busey, Jan.
transmission through building walls of corrugated iron, Oct.
Heated their houses, how the Romans, March.
Heating a swimming pool, C. Teran, Feb.
a swimming pool, notes on, April.
auxiliaries for pressure systems of hot water, J. J. Wilson, Feb.
apparatus for the Hughes High School, Cincinnati, O., Jan.
central station, sources of trouble in customers' installations, William E. Darrow, Aug.
contractors, topics for discussion for, June.
dust in relation to, Konrad Meier, March.
hot water, important points in gravity, John Jaeger, Feb.
industry, efficiency in labor for the, Norman A. Hill, Feb.
large concrete factory buildings, Lee Tire & Rubber Co., Conshohocken, Pa., May.
office buildings by electricity, July.
practice, vacuum—a discussion, J. M. Robb, Jan.
rates, analysis of central station steam, A. E. Duram, Sept.
records, how to keep central station, H. R. Wetherell, Sept.
system, analysis of operating conditions of a central hot water, Public Service Co. of No. Illinois, Ira N. Evans, Oct.
system, features of a large forced hot water, Vanderbilt East River Homes, Richard Ruppell, Nov.
system, regulating the flow and return temperature in a large hot water, Public Service Co. of No. Illinois, Geo. E. Chapman, Aug.
system, paper mill, W. E. Piper, C. E., July.
systems, use of pumps in vacuum steam, Preston Daniels, M. E., Jan.
vacuo hot water, by forced circulation, Ira N. Evans, Feb.
warm air furnace, cause of failure in, Aug.
warm air, difficulties in connection with, March.
Heating and ventilating methods, exhibit of, Nov.
neutral zone in, L. Biro, June.
the Northwestern University buildings, J. M. Stannard, Sept.
work, separate specifications and contracts for, in public buildings in New York State, June.
an office building, advanced methods in, Aeolian Hall, New York, Dec.
problems, graphical solutions of, Prof. H. J. Thorkelson, Dec.
Heating and ventilation, attitude of heating engineers towards the new thought on, Oct.

of the Little Theatre, New York, July.
office practice in estimating, John D. Small, Aug.
of a mitten factory, Defiance Tick Mitten Co., Toledo, O., Samuel R. Lewis, Aug.
Hill, Leonard, health and ventilation, Nov.
Hill, Norman A., efficiency in labor for the heating industry, Feb.
Hospitals and schools, ventilating problems in, W. Gilman Thompson, M. D., May, June.
Hot water heating, auxiliaries for pressure systems of, J. J. Wilson, Feb.
important points in gravity, John Jaeger, Feb.
system, features of a large, Vanderbilt East River Homes, Richard Ruppell, Nov.
system, regulating the flow and return temperatures in a large, Public Service Co. of No. Illinois, George E. Chapman, Aug.
vacuo, by forced circulation, Ira N. Evans, Feb.
Hot water service tanks, April.
Humidifiers and air conditioning apparatus, elements in design of, Willis H. Carrier and Frank L. Busey, March.
Humidity and health, April.
coal bill higher with increased, May.
control for air washers, a method of automatic, J. I. Lyle, Nov.

I.

Industrial hygiene, national conference on, May.
International Association for Testing Materials, June.

J.

Jaeger, John, important points in hot water gravity heating, Feb.
Jennings, William, depreciation in underground steam mains, Sept.
Johns-Manville Co., H. W., moves to larger quarters, May.
Johnson, Warren S., death of, Jan.

K.

Kutner, Sidney D., variation of weight and heat content per gallon of water, Jan.

L.

Labor Laws, proposed amendments to the New York State, Dec.
Legal decisions.
bankrupt contractor trustees' right to recover contract price, Feb.
effect of acceptance of heating plant by owner, March.
warranty of furnace—buyer's duty, March.
waiver of lien by tender of note, April.
liability for damage caused in shutting off heating apparatus, April.
architect's right to select particular covering, May.
McCreery patent on air purifying apparatus upheld by U. S. Circuit Court of Appeals, May.
contributory negligence of radiator company's employee, July.
damage for breach of contract—offer to make repairs, Aug.
substantial compliance with contract, Aug.
provision for notice of defects to surety company—construction, Sept.
indivisible contract unenforceable in part where void in part, Oct.
contractor's lien for heating plant as against purchaser of building, Oct.
breach of warranty—measure of damges, Oct.
heating company a quasi public service corporation, Nov.
recovers from surety on original contractor's bond, Nov.
liabilities for injuries to workman, Nov.
right of tenant to remove heater, Nov.
Lewis, Samuel R., heating and ventilation of a mitten factory, Defiance Tick Mitten Co., Toledo, O., Aug.
Liability insurance company, contractors for mutual, Sept.
Little Theatre, New York, heating and ventilation of the, July.
Lyle, J. I., a method of automatic humidity control for air washers, Nov.

M.

Manufacturers' 1912 flange schedule adopted, Aug.
and Dealers' Protective Association, July.
standard for flanged fittings and flanges, Sept.
Meier, Konrad, dust in relation to heating, March.
the natural ventilating standard, Oct.
Metric system in Denmark, May.
McCrum-Howell Co., failure of, April.
Mobley, Edward S., trouble with a swimming pool heating apparatus, May.
Moving picture shows, New York Chapter's recommendations for the compulsory ventilation of, Feb.

N.

National Association of Jobbers of Wrought Iron Pipe and Fittings, May.
Association of Master Plumbers, Sept.
Association of Master Steam and Hot Water Fitters, date set for annual convention, March.
1912 U. S. standard flange schedule, March.
annual meeting of Wisconsin association, March.
new quarters for Philadelphia association, March.
annual dinner of Newark association, April.
Pennsylvania State Association, May.
programme for twenty-fourth annual convention, June.
twenty-fourth annual convention, July.
Philadelphia local association, July.
National Pipe and Supplies Association, June.
National District Heating Association, Jan., May, June, July, Aug., Nov.
programme for annual convention, May.
fourth annual convention, July.
Neutral zone in heating and ventilation, L. Biro, June.
New Books,
Mechanics of Heating and Ventilation, Konrad Meier, March.
Tuberculosis and Hospital and Sanatorium Construction, Thomas S. Carrington, M. D., Jan.
Practical Manual of Steam and Hot Water Heating, Edward Richmond Pearce, April.
Applied Heating and Ventilation, James M. Harrison, Oct.
Central Station Heating, Byron T. Gifford, Oct.
Principles of Heating, second edition, Wm. G. Snow, Oct.
Steam and Hot Water Heating, H. C. Lincoln, Oct.
Practical Steam and Hot Water Heating, second edition, Alfred G. King, Nov.
New York City, record of the weather in, for Nov., 1911, Jan.
record of the weather in, for Dec., 1911, Feb.
record of the weather in, for Jan., 1912., March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912, June.
record of the weather in, for Oct., 1912, Dec.
City weather records, Mar.
school buildings criticised—report of Chas. G. Armstrong, Aug.
Norris, A. C., a simple method of testing air for carbon dioxide, Dec.

O.

Occupational diseases, May.
Open-Air Schools in Brookline, Mass., report on, Dec.

P.

Paper mill heating system, W. E. Piper, C. E., July.
Paul System Co., of New York, to dissolve, June.
Peat, government report on, Jan.
Piper, W. E., paper mill heating system, July.
Pittsburg, record of the weather in, for Nov., 1911, Jan.
record of the weather in, for Dec., 1911, Feb.
record of the weather in, for Jan., 1912, March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912, June.
record of the weather in, for Oct., 1912, Dec.
Pressure reduction and regulation, problems in, A. W. Cash, Sept.
Price, Geo. M., effect of confined air upon health of workers, Dec.
Pumps, use of, in vacuum steam heating systems, Preston Daniels, M. E., Jan.

R.

Radiators, unique cold air shield for direct, May.
arrangement of direct-indirect, Dec.
Rate of heat transmission in indirect surface air heaters, Willis H. Carrier and Frank L. Busey, Jan.
Refrigeration for apartment houses, Sept.
Review of heating literature,
III.—Figuring flow of air in metal pipes by chart, Burt S. Harrison, Jan.
Robb, J. M., vacuum heating practice—a discussion, Jan.
Row, O. M., effect of water pressure in the transmission of heat from steam through surfaces, May.
Ruppell, Richard, features of a large forced hot water heating system, Vanderbilt East River Homes, Nov.
Russell, H. C., drying apparatus, April.

S.

School buildings criticised, New York—report of Chas. G. Armstrong, Aug.
rooms, proposed standard arrangement for testing air in, April.
Schools, ventilating problems in hospitals and, W. Gilman Thompson, M. D., May, June.
Small, John D., Office practice in estimating heating and ventilation, Aug.
Smoke, effect of, on air and light, Nov.
Spencer, A. D., possible causes of financial loss in operating central heating plants, July.
Spray head, a novel, Nov.
St. Louis, record of the weather in, for Nov., 1911, Jan.
record of the weather in, for Dec., 1911, Feb.
record of the weather in, for Jan., 1912, March.
record of the weather in, for Feb., 1912, April.
record of the weather in, for March, 1912, May.
record of the weather in, for April, 1912., June.
record of the weather in, for Oct., 1912, Dec.
Standard flange schedule to be exxtended, May.,
Stannard, J. M., heating and ventilating the Northwestern University buildings, Sept.
Steam fitters, journeymen, ordered to join plumbers' organization, April.
mains, depreciation in underground, William Jennings, Sept.
traps, radiator, proposed method of testing, Sept.
Stevens, M. T., ventilation as observed by a city health department, May.
Still, F. R., removal of waste and refuse by fans and blowers, Oct.
Sub-contracting, the issue of, July.
Swimming pool, heating a, C. Teran, Feb.
pools, notes on heating of, April.
pool heating apparatus, trouble with a, Edward S. Mobley, May.

T.

Taggart, Ralph C. Taggart, open windows with mechanical ventilation, Oct.
Tea, Peter L., E. E., the time required to heat large buildings to normal temperature, May, June.
Telephone booths, ventilating systems for, Dec.
Temperature and ventilation as efficiency factors in mill, C.E. A. Winslow, Nov.
equivalents of wind velocities, H. W. Whitten, Aug.
equivalents of wind velocities, Oct.
regulation, mystery of, Verner F. Davis, April.
Temperatures, rotation of normal, William Campbell, Aug.
standard minimum outside, Aug.
Teran, C., heating a swimming pool, Feb.
Thermal chart, Burt S. Harrison, March.
Thermostat in operation, the, June.
Thorkelson, Prof. H. J., graphical solution of heating problems, Dec.
Time element in heating apparatus, James A. Donnelly, May.
required to heat a radiator, James A. Donnelly, Oct.
required to heat large buildings to normal temperature, Peter L. Tea, E. E. May, June.
Transmission of heat from steam through surfaces, effect of water pressure in preventing, O. M. Row, May.
Thompson, M. D., W. Gilman, ventilating problems in hospitals and schools, May, June.

U.

U. S. standard schedule for standard and extra heavy flanged fittings and flanges, advantage of the 1912, Aug.

V.

Vacuo hot water heating by forced circulation, Ira N. Evans, Feb.
Vacuum cleaning, art of, Austin H. Hart, March, April, May.
cleaning tools and exhausters, tests of, M. S. Cooley, Feb.
heating systems, float valves for, Spencer Curtis, April.
heating practice—a discussion, J. M. Robb, Jan.
requirements of an ideal vacuum cleaning system, M. S. Cooley, Dec.
steam heating systems, use of pumps in, Preston Daniels, M. E., Jan.
Vapor heating, the teakettle as an illustration of, June.
Variation of weight and heat content per gallon of water, Sidney D. Kutner, Jan.
Ventilating practice, an engineer's answer to recent criticism of modern, July.
problems in hospitals and schools, W. Gilman Thompson, M. D., May, June.
standard, the natural, Konrad Meier, Oct.
systems for telephone booths, Dec.
Ventilation as observed by a city health department, M. T. Stevens, May.
Chicago's new bureau of, Jan.
for a Sunday school auditorium, Christian Union Congregational Church, Upper Montclair, N. J., April.
factory, in New York State, Mar.
health and, Leonard Hill, Nov.
inspector in charge appointed in Chicago, July.
mechanical, open windows with, Ralph C. Taggart, Oct.
new thought concerning, April.
of a dispensary building, A. M. Feldman, Sept.
of a steam laundry, A. M. Feldman, March.
of moving picture shows, New York Chapter's recommendations for compulsory, Feb.
of the Pennsylvania tunnel in New York City, B. W. Bennett, M. E., Aug.

W.

Wetherell, H. R., how to keep central heating station records, Sept.
Whitten, H. W., currents of air in front of windows, Jan.
temperature equivalents of wind velocities, Aug.
Wind velocities, temperature equivalents of, H. W. Whitten, Aug.
velocities, temperature equivalents of, Oct.
Windows, currents of air in front of, H. W. Whitten, Jan.
Winslow, C.-E. A. Winslow, temperature and ventilation as efficiency factors in mills, Nov.
Weather reports, for,
November, 1911, Jan.
December, 1911, Feb.
January, 1912, March.
February, 1912, April.
March, 1912, May.
October, 1912, Dec.
